PROFESSIONAL SUMMARY

Frontend Developer with **3+ years of experience** developing scalable Single Page Applications (SPAs) and converting complex Figma designs into responsive, production-ready React interfaces. Proven track record in state management architecture, TypeScript integration, and performance optimization (**Core Web Vitals**). Adept at driving cross-functional collaboration with product and technical teams in Agile environments to deliver robust, accessible UI components.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React.js, TanStack Router, React Hooks, Tailwind CSS, Bootstrap
- **State Management:** Redux Toolkit, Redux, Context API, React Query
- **API Integration & Security:** REST APIs, Axios, Async/Await, GraphQL, JWT Authentication, CORS
- **Build Tools & Pipelines:** Webpack, Vite, Babel, NPM, Vercel
- **Testing & Debugging:** Jest, React Testing Library, React DevTools, Redux DevTools, Chrome DevTools, Lighthouse
- **Performance & Practices:** Core Web Vitals, Lazy Loading, Code Splitting, Memoization, Git, GitHub, Jira, Agile/Scrum, CI/CD, PRs, WCAG

WORK EXPERIENCE

Sclera VDMS Private Limited

Frontend Developer

Mangaluru, India

07/2023 – 05/2026

- Led development of complex React.js features including the full rebuild of the Procedure module, architecting the AssociateContainer component with staging, dual tracking, merge strategy, and validation patterns, cutting development handover time by **~35%**.
- Migrated **50+ legacy JavaScript components** to strictly typed TypeScript interfaces, decreasing runtime errors by **30%** across the application lifecycle.
- Architected scalable state management solutions using Redux Toolkit on **4 enterprise-grade features**, securely handling **100+ global state variables** and reliable API integration.
- Authored comprehensive unit and integration tests using Jest and React Testing Library, achieving **85% test coverage** and preventing **15+ critical regression bugs** before production deployment.
- Optimized application performance by resolving critical bottlenecks and applying lazy loading and memoization strategies, minimizing re-renders from 12 to 3 per interaction and cutting load time from 4.2s to 1.8s (**57% faster**).
- Configured Webpack/Vite build pipelines to implement script splitting, shrinking final bundle sizes by **40%** and improving Core Web Vitals (LCP) by **1.2 seconds**.
- Conducted **100+ peer reviews** via GitHub Pull Requests and established frontend standards, dropping QA rejection rates by **20%** within Agile/Jira workflows.
- Designed and enforced a form validation pipeline using the useForm hook, lowering invalid submissions by **~45%** and improving data quality for a multi-regional enterprise client base.
- Diagnosed and resolved a critical multi-language UI rendering bug impacting **10+ components**, eliminating layout failures on all language switches and restoring full usability.

Sclera VDMS Private Limited

Frontend Intern

Mangaluru, India

03/2023 – 07/2023

- Built mobile-first responsive layouts for **8+ screens** using React.js, HTML5, CSS3, and Tailwind CSS, translating wireframes into polished, deployment-ready interfaces.
- Integrated **15+ REST API endpoints** to power dynamic UI features, successfully meeting **100%** of sprint deadlines within a collaborative Agile team.

PROJECTS

Financial Dashboard | *React.js, Vite, Tailwind CSS, Recharts, Finnhub API, Vercel*

- **Live Demo:** financial-dashboard-five-delta.vercel.app
- Built a real-time financial dashboard that fetches live stock data for **50+ tickers** via REST polling and WebSocket integration with **sub-200ms latency**.
- Visualized **5+ years** of historical stock trends and user portfolio data using Recharts, ensuring highly responsive layouts across **4 distinct screen breakpoints**.
- Set up a fast Vite build pipeline with Tailwind CSS, achieving a **98/100 Lighthouse performance score** for a polished UI deployed on Vercel.

Shopping Cart Application | *React.js, Redux Toolkit, TypeScript, Tailwind CSS*

- **Live Demo:** <https://shopping-cart-redux-1ou9.vercel.app/>
- Developed a full shopping cart with Redux Toolkit state management, implementing addItem, removeItem, and clearCart reducers with clean action patterns, deployed on Vercel with **100% uptime**.
- Eliminated **3 major bottlenecks** using React.memo, useCallback, and useMemo profiled via React DevTools, achieving significantly faster load speeds.
- Wired REST APIs via Axios with complete loading, error, and success state handling, Assuring reliable and consistent data fetching.
- Enforced JWT-based auto-logout with a **10-second inactivity window** using useRef and setTimeout, securing session management throughout the application.

EDUCATION

Canara Engineering College

Bachelor of Engineering, Information Science and Engineering

Mangaluru, India

2019 – 2023

CERTIFICATIONS

- Frontend Development – Great Learning
- Generative AI Mastermind
- ClaudeCode in Action – Anthropic
- SQL Basics – QSpiders
- Web Development and SQL Internship – QSpiders
- English, Kannada, Hindi, Konkani
