PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience who built responsive React interfaces, reusable component libraries, and cross-browser HTML/CSS layouts from Figma designs. Demonstrated strength in semantic markup, performance optimization, and cross-functional collaboration with product and engineering teams to ship production-ready UI.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Redux Toolkit, Context API, React Hooks, Custom Hooks, Tailwind CSS, Bootstrap, CSS Modules

State Management: Redux Toolkit, Redux, Context API, React Query

API Integration: REST APIs, Axios, Async/Await, GraphQL (familiar)

Build Tools & Pipelines: Webpack, Vite, Babel, NPM, Vercel

Testing & Debugging: Jest, React Testing Library, React DevTools, Redux DevTools, Chrome DevTools

Performance: Lazy Loading, Code Splitting, Memoization (React.memo, useMemo, useCallback), Re-render Optimization

Tools & Practices: Git, GitHub, Agile/Scrum, CI/CD, Cross-Browser Compatibility, Responsive Design

WORK EXPERIENCE

Sclera VDMS Private Limited

Mangaluru, India

Frontend Developer

07/2023 – 05/2026

- Led development of complex React.js features including the full rebuild of the Procedure module, architecting the AssociateContainer component with staging, dual tracking, merge strategy, and validation patterns, cutting development handover time by ~35%.
- Architected and rolled out scalable state management solutions using Redux Toolkit on multiple enterprise-grade features, ensuring predictable data flow and reliable API integration.
- Optimized application performance by resolving critical re-render bottlenecks and applying lazy loading and memoization strategies, reducing re-renders from 12 to 3 per interaction and cutting load time from 4.2s to 1.8s (57% faster).
- Built and maintained a reusable React component library spanning 8+ screens, reducing UI inconsistencies by ~25% and accelerating feature delivery for the team.
- Designed and enforced a form validation pipeline using the useForm hook, reducing invalid submissions by ~45% and improving data quality for a multi-regional enterprise client base.
- Implemented @dnd-kit drag-and-drop for checklist step reordering, delivering smooth, accessible interactions within the Procedure workflow.
- Diagnosed and resolved a critical multi-language UI rendering bug impacting 10+ components, eliminating layout failures on all language switches and restoring full usability for 100% of the client base.
- Engineered light/dark theme accessibility improvements using targeted CSS enhancements, reducing platform-wide accessibility issues by ~30%.
- Partnered cross-functionally with backend engineers, designers, and product managers in a 3-person agile team, consistently shipping features within sprint cycles.

Sclera VDMS Private Limited

Mangaluru, India

Frontend Intern

03/2023 – 07/2023

- Built mobile-first responsive layouts for 8+ screens using React.js, HTML5, CSS3, and Tailwind CSS, translating wireframes into polished, deployment-ready interfaces.
- Integrated REST APIs to power dynamic, data-driven UI features and met all sprint deadlines within a collaborative agile team.
- Authored semantic, accessible HTML markup and applied cross-browser CSS fixes ensuring consistent rendering on Chrome, Firefox, Safari, and Edge.

PROJECTS

Financial Dashboard | *React.js, Vite, Tailwind CSS, Recharts, Finnhub API, WebSocket, Vercel*

- **Live Demo:** <https://financial-dashboard-five-delta.vercel.app>
- Built a real-time financial dashboard that fetches live stock data via REST polling and WebSocket integration with the Finnhub API.
- Visualized stock trends and portfolio data using Recharts with clean, responsive chart layouts on all screen sizes.
- Configured a fast Vite build pipeline with Tailwind CSS for a polished UI deployed on Vercel.

Shopping Cart Application | *React.js, Redux Toolkit, TypeScript, Tailwind CSS, Vercel*

- **Live Demo:** <https://shopping-cart-redux-2vzymcdc4-hemanthbhat15s-projects.vercel.app/>
- Architected a full shopping cart with Redux Toolkit state management, implementing addItem, removeItem, and clearCart reducers with clean action patterns, deployed on Vercel with 100% uptime.
- Eliminated 3 major re-render bottlenecks using React.memo, useCallback, and useMemo profiled via React DevTools, achieving significantly faster load speeds.
- Wired REST APIs via Axios with complete loading, error, and success state handling, ensuring reliable and consistent data fetching on all components.
- Enforced JWT-based auto-logout with a 10-second inactivity window using useRef and setTimeout, securing session management throughout the application.

EDUCATION

Canara Engineering College

Bachelor of Engineering, Information Science and Engineering

Mangaluru, India

2019 – 2023

CERTIFICATIONS

Frontend Development – Great Learning

Generative AI Mastermind

Claude Code in Action – Anthropic

SQL Basics – QSpiders

Internship Certificate – Web Development and SQL, QSpiders

LANGUAGES

English, Kannada, Hindi, Konkani
